

Portrait of a Saint: Enlargement Using a Grid

Each student will find a portrait of a saint of his/her choice and make a copy approximately 8x10", and grid that portrait to 1/4". He/she will grid a white 18x24" paper to a 1" grid. The student will label one axis with letters and one axis with numbers on both papers. The student will draw the contents of each 1/4" square in the portrait to a 1" square on the larger paper according to the lettered and numbered coordinates.

Grading will be based on accuracy of portrait to enlargement.
